EDITOR'S FOREWORD

The papers in this issue are revised versions of selected papers presented at the Fourth Scandinavian Workshop on Algorithm Theory, SWAT'94. The workshop was held in Århus, Denmark, July 6-8, 1994. The selected papers are all within the scope of Nordic Journal of Computing. The authors were invited to submit their papers to this issue. They have undergone the same refereeing procedure as other papers published in NJC.

The success of such a timely special issue is heavily dependent on co-operation from all parties involved. It is a pleasure to thank the referees and authors for their valuable contributions and co-operation in these matters.

Sven Skyum
